EDUCATION

Bachelor of Computer Science, Indian Institute of Information Technology Ranchi (CGPA 7.98) 2021-2025
Grade XII, 3D SCIENCE ACADEMY(95.2%) 2019-2021

TECHNICAL SKILLS

Languages: Python, C, C++
Technologies/Frameworks/Libraries: PyTorch, scikit-Learn, Pandas, Numpy, OpenCV, HuggingFace, FastAPI, Flask
Deep Learning: ANN, CNN, RNN, LSTM, Transformers, Agents
GenAI: Langchain, LangGraph, Quantization, Fine Tuning LLMs, Langflow

COMPETITIONS

Achieved 3rd place in Task 1 and 8th place in Task 2 at the HASOC 2024 Competition.

PAPERS

Detecting Hate Speech in Hinglish: A BiLSTM Neural Network Approach. [Paper](#)

Detecting Hate Speech in Bangla: A Hybrid Model Using Machine Learning and Lexicon-Based Strategies. [Paper](#)
Kirti Kumari, Vinayak Vijay, Avishikta

PROJECTS

Semantic Segmentation Of water Bodies

- Trained UNet model using Pytorch framework and got the loss value of 0.59 on the Kaggle open-source water bodies dataset.

Movies recommendation

- Developed a end to end movies recommendation system which will recommend top 5 movies according to your search on the tab
- Count Vectorizer(max featurers = 5000) is used for determining the similarities between the words and feature extraction
- Used Streamlit to generate a user-friendly interface which allows users to input queries and display the response of the model.

Fitness Bot

- Adopted LangChain and OpenAI to make a Chatbot with custom tools for fitness-related tasks.
- It can accurately extract nutrition-related information using APIs, calculate BMI and offer diet charts accordingly.
- Utilized LangChain, OpenAI, Agents and Custom Tools.

Email Writing Agent

- Developed an Email Agent that writes the email according to the query of the user using Langgraph. It provides the user with options to select the best email template for their needs.
- This Agent is personalized for the user. FastAPI is used for the backend, Streamlit for the frontend, and SQLite for the database to store user credentials.

CERTIFICATIONS

- Udemy Online Certification-Machine Learning and Applications - [Certificate](#)
